GUEST LECTURE ON INTERNET OF THINGS

To expose the recent trends in Information and Communication Engineering, the department of CSE organized a Guest Lecture on “Internet of Things” on 25th July, 2018. **Mr. Shivaprasad**, Trainer & Developer, FreshSkills graced the dais as the resource person of the event.

Mr. Shiva Prasad highlighted the impact of the IOT in numerous real-world applications. IOT provides a platform which integrates data from different devices and applies Data Analytic techniques to extract more valuable and analytical information that can be found to be useful in automation.

The guest lecture started with a presentation that gave a brief introduction on the domain that visualized many related applications. The video enlightened the audience with how IOT can be applied for home automation system, as one of the applications. The sensors he showed gave the audience a good exposure towards this technology and its implementation strategies. The session ended up with a brainstorming query session where the students interacted enthusiastically and the resource person answered their queries and cleared their doubts.
